

Robust and Secure Communication Solutions

For Safer and More Efficient Critical Missions

Creomagic develops and manufactures innovative communication solutions that form intelligent Mobile Ad-Hoc Networks (MANET), specifically designed for mission-critical and tactical operations. Our radio technology provides users with reliable, secure, and resilient connectivity for any mission.

Leading with Innovation

At the core of our solutions is CreoNet, a software-defined radio (SDR) technology developed by Creomagic that leverages world-leading capabilities, including advanced waveforms, machine learning, and networking technologies. Our solutions are engineered and fine-tuned by a highly experienced team, committed to the highest standards of innovation across our products and services.

Empowering Tactical Applications

Creomagic robust communication solutions empower military and first responder teams across the globe, to operate efficiently and effectively, even in the most challenging scenarios. Our plug-and-play integration capability perfectly aligns with the requirements of system integrators and platform manufacturers, ensuring top-notch performance and reliability.

Wide Range of Solutions

Creomagic offers a comprehensive suite of communication solutions designed for multi-domain operations, supporting airborne, ground, maritime and personal tactical communication networks.

Our solutions excel in demanding scenarios, such as electronic warfare and congested spectrum areas, thereby boosting operational effectiveness at the tactical edge.
