

FUTURE AIR FORCE CONFERENCE 2025

Prague, 17–18 Sept 2025

We are pleased to announce the third edition of the Future Air Force Conference. The increasing interest from nations, defence industry, academia, and independent aviation experts is a great recognition, but an even greater commitment to the future.

The 3rd Future Air Force Conference will convene senior-level experts and decision-makers across Air Force Command, international organizations, air force training subject-matter experts, industry, and academia for a discussion on innovative approaches to Air Force personnel training.

The 2025 Conference will discuss how the Air Force's leadership, in partnership with industry and academia, is modernizing training for their personnel through adopting cutting-edge technologies to ensure sustained air superiority.

Innovative Approaches to Aviation Training

The modern battlefield is more complex and dynamic than ever before, necessitating a revolution in how military pilots are trained. This year, the conference will explore groundbreaking methods and technologies poised to redefine pilot training programs.

Live Virtual Constructive (LVC) Training

Artificial Intelligence (AI) and Machine Learning

Augmented Reality (AR) and Virtual Reality (VR)
