## EUDIS Defence Hackathon 2025

# EUDIS Defence Hackathon 2025

The EUDIS Defence Hackathon 2025 is the second edition of an international hackathon designed to connect developers, experts, and leaders in the defense industry. Its goal is to strengthen Europe's defense capabilities, drive innovation in this field, and build a community stretching from Ukraine to the Atlantic.

This initiative is backed by the European Commission, specifically the Directorate-General for Defence Industry and Space (DG DEFIS) through EU Defense Initiative Scheme (EUDIS). The event aligns with the objectives of the European Defence Fund (EDF) — supporting startups and small businesses, whether civilian or defense-related, in entering the market and enhancing European security through their innovative projects.
