IRVE, a new industrial project

A new Italian industrial project was born in August 2023

IRVE | Industrie Riunite Veneto Emiliane

currently composed of three companies with deep roots in their region:

- Plaber S.r.l. (Bassano del Grappa, Vicenza)
- Plastmeccanica S.r.l. (Correggio, Reggio Emilia)
- Union Stampi S.r.l. (San Quirino, Pordenone).

plaber[®]

PLASTMECCANICA

UNION
STAMPI

plaber

Founded in **2006**, in Bassano del Grappa (Veneto).
The production of HPRC | High Performance Resin Cases
begins. In 2016, opening of a branch in the USA.

Vision: become the reference player in the market of **high resistant technical containers**.

Mission: design and manufacture the best transport and protective solutions, supporting our customers with turnkey projects. Be compliant with international standards and regulations while operating sustainably and environmental friendly.

The strategic design: behind the above is very simple. The case is, by its very nature, a storage and transport solution. If a case is deprived of wheels and trolley handle, the result is a container (**storage solutions**). Similarly, if the lid is removed from suitcase, a trolley comes out (**transport solution**).

In 2021 Plaber and **Plastmeccanica**, an Emilian company specialized in plastic injection moulding and mould making, merged into a single group, giving birth to the **first high-resistant technical container district**.

In August 2023, the Friuli-based **Union Stampi** was acquired.

Plastmeccanica was founded in **1967** in Correggio (Emilia Romagna) with the aim of:

- transforming polymers to products
- designing and manufacturing moulds.

Nearly 60 years of experience and know-how developed in most of the product sectors that use plastic products.

The creation of the moulds is entrusted to the internal mould and tooling workshop.

From **the injection moulding of the products to the 360° design**, Plastmeccanica is synonymous with maximum reliability, professionalism and quality.

The company designs and manufactures **medium/big sized moulds for plastic materials and die casting**, mainly for the automotive and household appliances market.

It has 16 CNC machines.

The competence, professionalism and flexibility of the company organization are the strengths customers all over the world have come to appreciate.

Brand overview

Alstora

Alstora, is the brand-new line of high Protective Storage Boxes.

Alstora is the crasis between ALPS and STORAGE. The choice of the name hand draws on our attachment to the land and to the mountains surrounding our headquarters located in Bassano del Grappa (Veneto).

High-performance **IP55** containers capable of perfectly combining technological innovation, design and sustainability in their DNA.

Zero Energy:
Planet friendly

100% recyclable Made in Italy 10 year warranty

From **industrial**, to **domestic** and **outdoor**, Alstora is synonymous with safe storage.

ConeCarts

ConeCarts: high-performance multi-purpose carts.

The brand name **ConeCarts** comes from the union of the words CONE (pine-cone) and CARTS. Once again, we wanted to emphasize the attachment to our territory and the mountains surrounding Bassano del Grappa.

Not ordinary carts. Handling, protection and storage solutions of elegant and distinctive design. Whose use ranges from logistics to industrial and broadcasting.

100% Made in Italy

10 year warranty
